Technical Skills

Programming/Database: Python, TypeScript, React, MySQL, Postgres

Database Management: pgAdmin, MongoDB Compass

Ticketing Software: JIRA, Freshdesk

Operating Systems: Windows, Linux, MacOS

Relevant Experience

University of Rochester Rochester, NY
System Engineer I July 2026 – Present

- Assisted in the management and administration of multi-platform infrastructure (Linux, macOS, and Windows) at the desktop, lab and workstation level.
- Ensured that high-performance computing resources and lab-specific workstation deployments were secure, automated, and high-performing.
- Deployed and supported heterogeneous environments, with a heavy emphasis on Linux (RHEL/Ubuntu) for departmental servers and macOS/Windows for student and faculty workstations.

Bryx Rochester, NY
Customer Support Engineer May 2022 – March 2026

- Triaged and resolved customer issues across hardware and software environments, diagnosing root causes and improving resolution times and customer satisfaction.
- Collaborated with cross-functional teams to deliver cohesive solutions, aligning efforts to efficiently meet customer needs and achieve shared service goals.
- Performed remote and on-site troubleshooting of rack-mounted hardware and associated software, minimizing downtime and ensuring reliable system performance.
- Developed high-quality Python code to address customer requests.

Chiropassion Consulting Cicero, NY
Data Analyst / Social Media Manager March 2021 – June 2021

- Analyzed Google Analytics data to identify trends in sales and course enrollments, uncovering insights that informed marketing strategies and improved targeting effectiveness.
- Optimized Google Ads campaigns by refining keyword strategy and implementing negative keywords, reducing wasted ad spend and increasing campaign efficiency.
- Enhanced CTR and SEO by improving ad copy, keyword alignment, and on-site content, driving higher traffic quality and engagement.

Camden Central School District Camden, NY
IT Support Technician June 2017, August 2018

- Repaired and restored functionality of 50+ laptops by diagnosing and fixing hardware issues (screens, motherboards, fans, batteries, and data ports), reducing device downtime.
- Performed installation and decommissioning of classroom computer systems, ensuring seamless setup for instructional use.
- Managed and tracked inventory of electronic devices, helping implement an organized system that improved asset accountability and reduced loss or misplacement.
- Processed and fulfilled client work orders efficiently, prioritizing requests and maintaining clear communication.

Education

State University of New York (SUNY) College at Oswego

Bachelor of Arts – Information Science

Minor in Computer Science & Cognitive Science

Dean's List: Fall 2020

December 2020
